  - a. Valid Identification (Passport, Driver's License, Resident Card, Maryland MVA Card)
  - b. Two (2) soft-lead, #2 pencils
  - c. A single quarter (US 25 cents coin) to store your belongings in the locker room. The quarter will be returned after you finish the test.
2. Ask the Testing staff (at your site) whether the test will be timed. Plan your schedule accordingly.
3. Dictionaries or other aids may not be used during the test.
4. The Largo Campus testing center requires all personal possessions brought into the testing area to be placed in a locker, which requires payment of a quarter.

**TESTING PURPOSE**

The Michigan Test consists of several tests that are useful for evaluating the English Language proficiency of students whose first language is not English.

Michigan Test scores serve as the basis for course placement. If the test results indicate deficiencies in standard, written English, the student will be required to take appropriate preparatory course work.

**Other Testing Requirements**

Students will be required to take a Mathematics placement test before enrolling in credit math courses. Math placement testing generally does not occur until after a student's initial meeting with an adviser.

**MICHIGAN TEST OF ENGLISH LANGUAGE PROFICIENCY**

The Michigan Test of English Language Proficiency consists of 100 multiple choice questions: 40 English Grammar questions, 40 Vocabulary questions, and 20 Reading Comprehension questions. If you test at a timed site, you will be given 75 minutes (One hour and fifteen minutes) to finish the entire test. After completing the Michigan Test, you will also be required to provide a Writing Sample on an assigned topic.

This Sample Test consists of 10 English Grammar questions, 10 Vocabulary questions, and 5 Reading Comprehension questions. At the end of the test is an answer key with which to check your answers to the Sample Test.

## Part I GRAMMAR

This test will measure how well you can recognize and use English grammatical structures. Each question in this test is part of a conversation — sometimes only one person is speaking and at other times there are two people speaking. In each conversation a word (or group of words) is left out. Following the conversation are four choices of words which might be used in the incomplete conversation. You are to select the word (or group of words) which would be used by a speaker of English, and which would best fit into the conversation.

### Part III READING COMPREHENSION

This test measures how well you read. There are four reading passages, followed by five questions about each passage. You should read each passage carefully and then try to answer the questions following that passage. If you do not know the answer at first, you may read the passage again, but do not spend too much time on one passage if your testing center has a time limit.

#### **Example Passage**

While I was getting ready to go to town one morning last week, my wife handed me a little piece of red cloth and asked if I would have time during the day to buy her two yards of cloth like that. I told her I would be glad to do it. And putting the piece of cloth into my pocket, I took the train for town.

The person telling the story is ....

- a) a married lady
- b) an unmarried lady
- c) a married man
- d) an unmarried man

You know that the person telling the story is (c) a married man because he says, "...my wife handed me..."

The author was given a piece of red cloth...

- a) in the morning
- b) at noon
- c) in the afternoon
- d) in the evening

The passage says, "...one morning last week, my wife handed me a little piece of red cloth ...", so the answer is: a) in the morning.

Answer questions 21 – 25 in this manner. Mark only one answer for each problem.

#### **Reading Passage for Questions 21-25**

The earth's crust averages 16 miles thick and rests on what is called the mantle. This layer, about 750 miles thick, is believed to be of a semi-viscous or plastic nature rather than solid. Thus, both continental

and oceanic areas could be said to float on the mantle, with continental areas pushing deeper into the mantle than do oceanic areas where the crust is thinner.

Constant erosion moves dirt and rock into ocean areas where they settle. These areas gradually sink deeper into the mantle, eventually creating pressures that thrust new land up from surrounding areas. Mountains formed by this process are made of sedimentary rock and are called folded or dome.

Earthquakes occur where the crust shifts or creeps apart sharply under pressure; the resulting breaks or fissures are called faults. Mountains created by these faults are called fault blocks.

In weak spots on the earth's crust – generally near sea coasts – gases and molten rock under tremendous pressure break through to form conical shaped mountains. These we know as volcanoes.

No sooner are new mountains and flatlands created by pressure than water, ice, and wind begin to wear them away, thus creating new valleys, river courses, and coastlines.

21. The first paragraph is mainly about the earth's

- a) continents
- b) crust
- c) mantle
- d) oceans

22. The writer uses the word "float" to describe the way

- a) dirt and rocks erode into the sea
- b) land and water areas rest on the mantle
- c) the mantle rests on the earth's core
- d) water areas drift onto the mainland

23. The mantle is

- a) a pliable substance under the crust
- b) a solid layer of the earth's crust
- c) a thin layer of earth under the ocean
- d) the semi-solid exterior of the earth

24. The second paragraph states that eroded material creates pressure in ocean areas, causing the formation of

- a) continental areas
- b) dome mountains
- c) fault blocks
- d) fissured reefs

25. Folded mountains consist of

- a) broad fissures
- b) molten rock
- c) plastic material
- d) sedimentary rock
