GUIDE
TEST STUDY
ACCUPLACER ONLINE is a computerized-adaptive testing that uses the computer to select whether the student has the skills to take freshman courses or would benefit most from developmental classes. These tests are delivered over the internet to provide fast and effective results to determine whether the student has the skills to take freshman courses or would benefit most from developmental classes.

ACCUPLACER ONLINE is a comprehensive battery of computerized tests for incoming college students. These tests are delivered over the internet to provide fast and accurate results to determine whether the student has the skills to take freshman courses or would benefit most from developmental classes.

ACCUPLACER ONLINE is a computer-based, adaptive testing program that uses the computer to select test items based on the proficiency of the examinee. The computer tailors the exam by keeping track of the examinee's performance on each test item and using that information to select the next item to be administered. The sequence of test questions will vary from student to student, and the next question administered is automatically chosen by the computer based on the examinee's performance.

The difficulty of the questions is automatically adapted by the computer based on the examinee's performance. The difficulty of the questions is automatically adapted by the computer based on the examinee's performance.

Our ACCUPLACER consists of:

- **Reading Comprehension**: 20 questions
- **Sentence Skills**: 20 questions
- **Arithmetic Skills**: 17 questions
- **Elementary Algebra**: 12 questions
- **College-Level Mathematics**: 20 questions
results, so do not take the ACCUPLACER lightly.
